EMERGENCY EVACUATION PLAN

Jurassic Park Expeditions • Est. Cretaceous

⚠ IN THE EVENT OF A CONTAINMENT FAILURE: Do not panic. Do not run. Running triggers pursuit instinct in carnivorous species. Walk briskly to the nearest evacuation point.

EMERGENCY CLASSIFICATION SYSTEM

All park emergencies are classified under the InGen Emergency Response Framework:

- **CODE GREEN** — Minor containment advisory. Animal outside designated zone but tracked. Continue normal operations.
- **CODE AMBER** — Containment breach. One or more animals unaccounted for. Restrict guest movement to secure zones.
- **CODE RED** — Multiple containment failures. Initiate full guest evacuation. Activate bunker protocols.
- **CODE BLACK** — Systems failure. All personnel proceed immediately to the dock. Do not stop for personal belongings.

PRIMARY EVACUATION ROUTES

Evacuation routes are marked with illuminated green signage throughout the park. In the event of a power failure, chemical glow sticks are located in all ranger stations. Routes are as follows:

1. Visitor Centre → East Road → Helicopter Pad Alpha (Primary)
2. Raptor Paddock Area → Maintenance Tunnel B → Bunker C → Dock (Secondary)
3. Safari Road → Emergency Jeep Station → North Dock (Tertiary)
4. Aviary → South Cliff Path → Submarine Bay (Aviary Incidents Only)

ASSEMBLY POINTS

All guests and non-essential staff must assemble at designated muster stations:

- **Muster Point 1** — Main Visitor Centre car park (capacity 200)
- **Muster Point 2** — East Dock (capacity 80, sea transport available)
- **Muster Point 3** — Helicopter Pad Alpha (capacity 12 per flight)
- **Muster Point 4** — Bunker C — underground — for use during airborne incidents only

DO NOT

5. Do not attempt to recapture escaped animals — this is not your job
6. Do not use the main road during a T-Rex event — stay off road entirely
7. Do not enter the raptor paddock under any circumstances, including to retrieve guests
8. Do not attempt to restore power systems unless you are a certified InGen engineer
9. Do not call the mainland until evacuation is complete — this triggers insurance review

COMMUNICATION

In the event of a park emergency, all communications are coordinated through the Central Control Room on Channel 7. If the Control Room is compromised, mobile command is established at the East Dock. Satellite phones are available in all ranger vehicles.

Media communications are handled exclusively by InGen Corporate Affairs. Staff are not authorised to speak to journalists, documentary filmmakers, or anyone carrying a video camera. This is for your protection as much as ours.

POST-EVACUATION

Following any evacuation event, all staff and guests are required to submit an incident report within 48 hours. InGen Legal will be in touch regarding any claims. Counselling services are available through the Employee Assistance Programme — please note that dinosaur-related trauma is covered under the standard mental health benefit.

REMEMBER: Life finds a way. But so does our legal team.
